Digital ERP

TALLY INTEGRATION

A unique feature which allows you to retain your existing financial system and still get the benefits of an enterprise class ERP to handle all your other departments. Your finance departments and your CA remarks happy using the best accounting software of the country. Implementation becomes a lot faster and easier with lesser changes involved in adaptation.

UNLIMITED USER LICENSE

Buy the license once without worrying about additional costs, while adding a new user to the ERP.

DASHBOARD WITH MIS REPORTS

Get amazing dashboard and MIS report with BI solution for DIGITAL ERP.

EXTENSIVE AUTHORIZATION PROCEDURE

A True ERP is useless without proper authorizations and security. Get control over everything.

COMPLETE SMS AND EMAIL ALERT INTERGRATION

Your business should work your physical presence in the factory , but stay completely in touch with whatever is happening.

INTEGRATED SOLUTION WITH ALL MODULES

You may need only a few modules now, but in future you shall grow to be a large enterprise. In that case too, we offer every module to suit your needs.

From the User's Perepective

TALLY INTEGRATION

Finance teams love Tally and we want them to stay with it. The integration is completely seamless, with no import-export involved . Avoid any duplication of entry with our unique Tally integrated ERP.

Easy to Adopt

Our solutions are as user-friendly as possible, easy to navigate control panel, extensive keyboard shortcuts and colour aesthetics.

Easy to Operation

Data entry gets easier with single point of entry, ensuring that data once entered is carried throughout the system. Combine multiple steps if you want. Also Template master systems ensures minimum data typing at the time of transaction.

Multi-Screen Access

Work without slowing down .open as many forms and report as you want and work simultaneously an them.

Analytical Reporting Tool

No Excel is required as advanced analytical features like sorting , filtering grouping, summary, pivots, etc. Are all available within the ERP. You can still always export any report to Excel.

Multi Company & Multi Location

Handle as many companies and location (branches/depots/warehouses) as you want. Switch between them without logging out and consolidate reports with a few clicks.

USP

» Intergration with Tally Accounting software requires no change in existing systems.

» Extensive Customization possible. User Definable custom fields, Taxes, Terms & conditions etc. User Definable document Printouts (Invoice / PO Formats / MRN etc.) Advanced Reporting systems with User definable parameters.

» **Hand Holding Implementation Approach**
We understand user requirements and train them according. We even provide facility for resident engineers where client do not have dedicated ERP admin to administer the ERP and provide re-traning to staff at a reasonable cost.

» **Report Scheduling**
You don't need to login to the system to view reports , as you can get it on your mail automatically.

» **Cloud Hosting**
No additional Software and Hardware required.

Highlighted features

» **Extensive WIP Production Module**
Track your production for each stage, machine, shift & operator. Also track rejections, reworks. Wastages, scraps for each production.

» **Extensive Item Tracking**
Use batch tracking, serial numbering, multiple measurement units.

» **Advance Requirement Planning (MRP) for production (In-House) and job work**

» **Automatic Vendors Scheduling and Purchase Indent Generation**

» **Repacking, Reprocessing and Replacement of Material**

» **In-depth Features for Landed cost Calculation including Post Transaction Costs**

» **Unlimited PO Amendment and Tracking**

» **Supplementary Invoice for retrospective rate amendments**

» **Multi-Currency Support**

» **Web base Authorization sitting anywhere in the world**

» **Export documentation: ARE, Annexure and**
Export Sales Invoice

» **Offline Invoices at Depot / warehouse**
